HEADLINE NEWS: **SimpliTRACE MOBILE** NEW & IMPROVED IMAGE!

The **SimpliTRACE Mobile** application is as versatile and practical as ever, and is now more **user-friendly**.

Five years after its launch, it was time for a facelift. For this reason, the menus and navigation have been revised to make submitting your declarations even easier and more efficient, even out in the field!

Download the latest version of **SimpliTRACE Mobile** for free from Google Play or the Apple Store.

A SOLUTION ADAPTED TO YOUR NEEDS

Imagine being able to access your inventory of identifiers and the summary of your traceability declarations at any time and from anywhere on your smart phone! No more paperwork, no more transcription errors and no more transmission delays!

The application works with or without an Internet connection, so why not take advantage of the speed and efficiency of **SimpliTRACE Mobile**? Your declarations will be ready to send as soon as your phone has a network connection.

WHY USE SimpliTRACE MOBILE?

SimpliTRACE Mobile is an application for iPhone and Android that allows Quebec producers to access the complete list of identifiers in their file and make all types of traceability declarations (movement, birth, death) easily and quickly from their phone.

Free, secure, user-friendly and versatile, this tool synchronizes with your **SimpliTRACE** account and automatically saves your information to your Attestra traceability files. You can consult your declarations from anywhere.

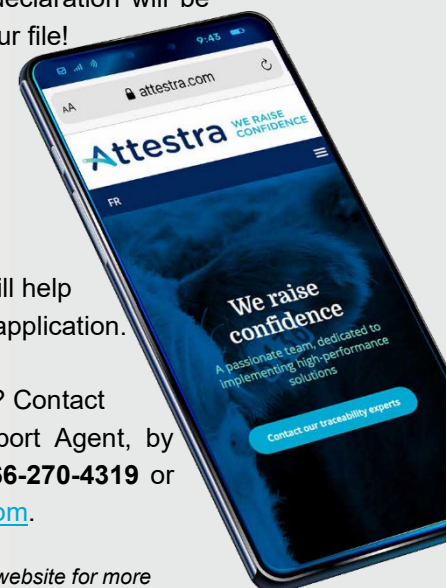

To take things up a notch, you can also pair **SimpliTRACE Mobile** with an RFID reader*: The data read by the reader will be transferred and temporarily stored on your phone, eliminating the risk of transcription errors. A few more clicks and your declaration will be transmitted and saved to your file!

Still not sure?
